FILE ANALYSIS REPORT**

Classified Files

Recent
 ■ 3,683,561 Total ■ 541,333 Classified

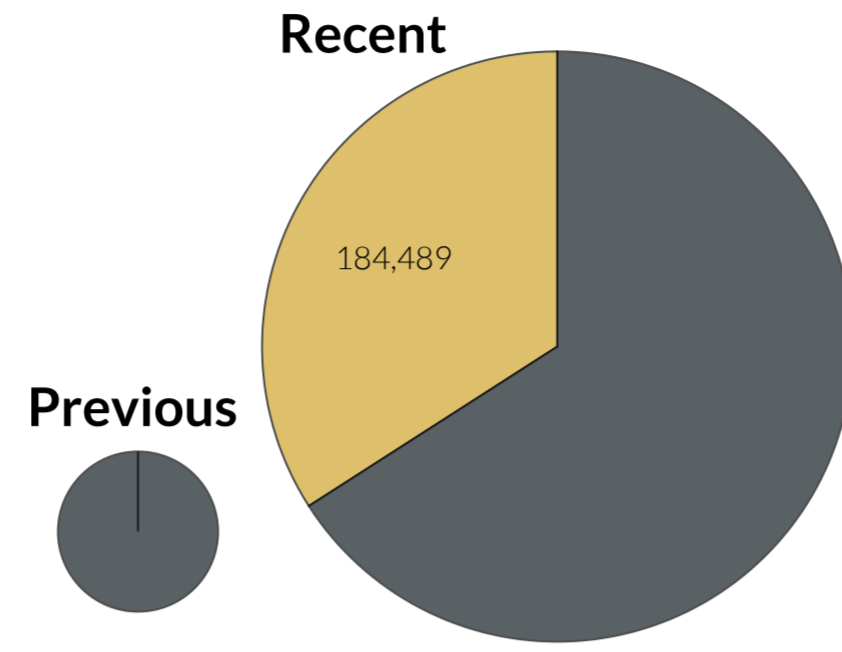

Previous
 ■ 0 Total ■ 0 Classified

- Percentage classified: 14.6%
- Change since last scan: 0%

The number of files found during the scan and the number of these files that were classified. Not all files can be classified. The snapshot shows how the volume of data is changing over time.

Recommendations unavailable. No previous scan.

Sensitive Files

Recent
 ■ 541,333 Classified ■ 184,489 Sensitive

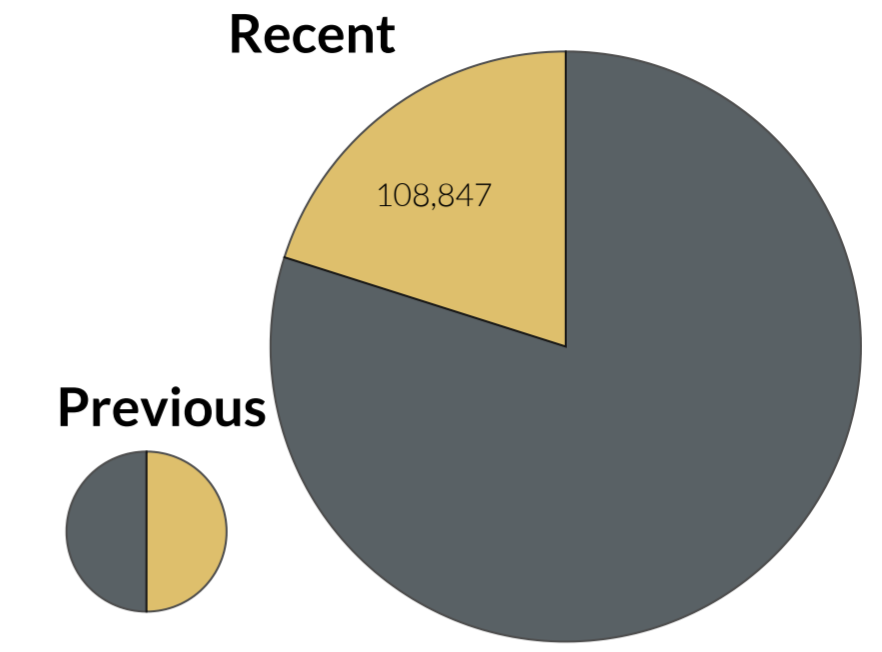

Previous
 ■ 0 Classified ■ 0 Sensitive

- Percentage sensitive: 34%
- Change since last scan: 0%

The number of files designated as sensitive in the file scan. These are files that are defined as sensitive by the system owner and contain regulated data as well company defined sensitive data.

Recommendations unavailable. No previous scan.

PII Files

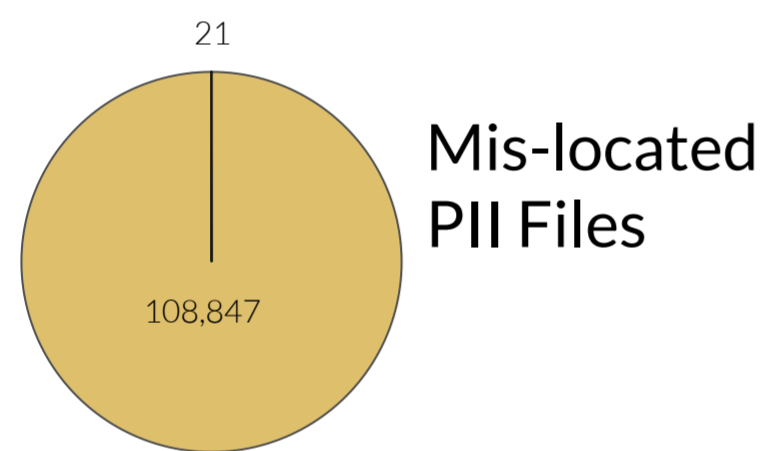

Recent
 ■ 541,333 Classified ■ 108,847 PII

Previous
 ■ 310,975 Classified ■ 155,517 PII

- Percentage PII: 20%
- Change since last scan: -30%

These are the files in the over all file set that contain PII. PII is information that, when used alone or with other relevant data, can identify an individual.

No recommendations as upgraded model.

Recent
 ■ 108,847 PII ■ 108,826 Mislocated PII

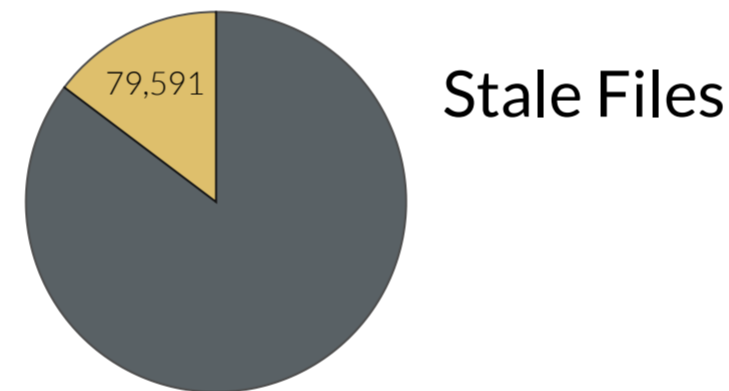

Previous
 ■ 0 Secure PII ■ 0 Mislocated PII

- Percentage mislocated PII: 99%
- Change since last scan: 0%

Mislocated files are files that contain PII but are in a folder path that is not correct. The client has defined that files of certain levels of classification will be in folders dedicated to these files e.g. Confidential files will be in a path that contains the word Confidential. This report detects files that are out of place.

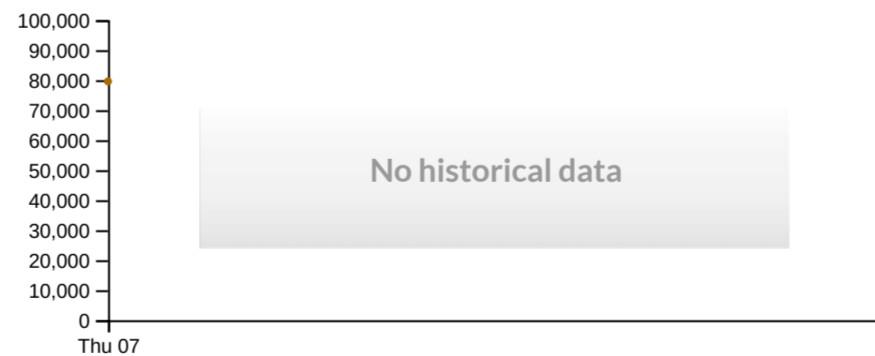

Recommendations unavailable. No previous scan.

Recent
 ■ 541,333 Classified ■ 79,591 Stale

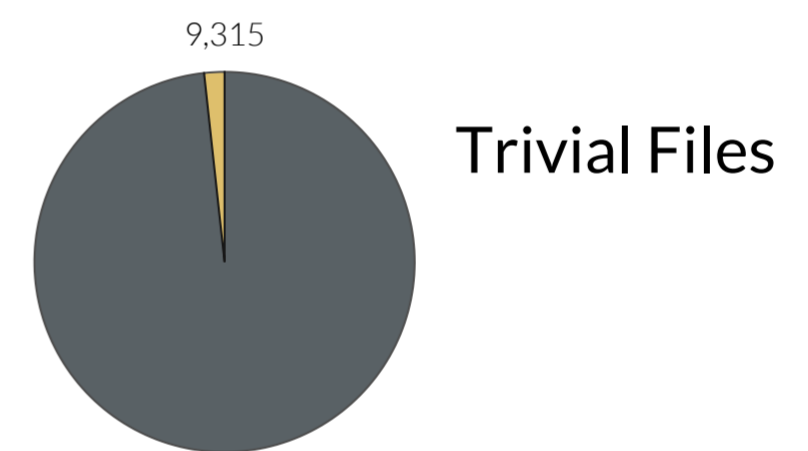

Previous
 ■ 0 Classified ■ 0 Stale

- Percentage stale: 14.7%
- Change since last scan: 0%

Stale files are all files (not directories) that are older than a given time window (age) or cut off date based on the last modified date. This report currently shows all files that are older than 15/12/2015.

Recommendations unavailable. No previous scan.

Recent
 ■ 541,333 Classified ■ 9,315 Trivial

Previous
 ■ 0 Classified ■ 0 Trivial

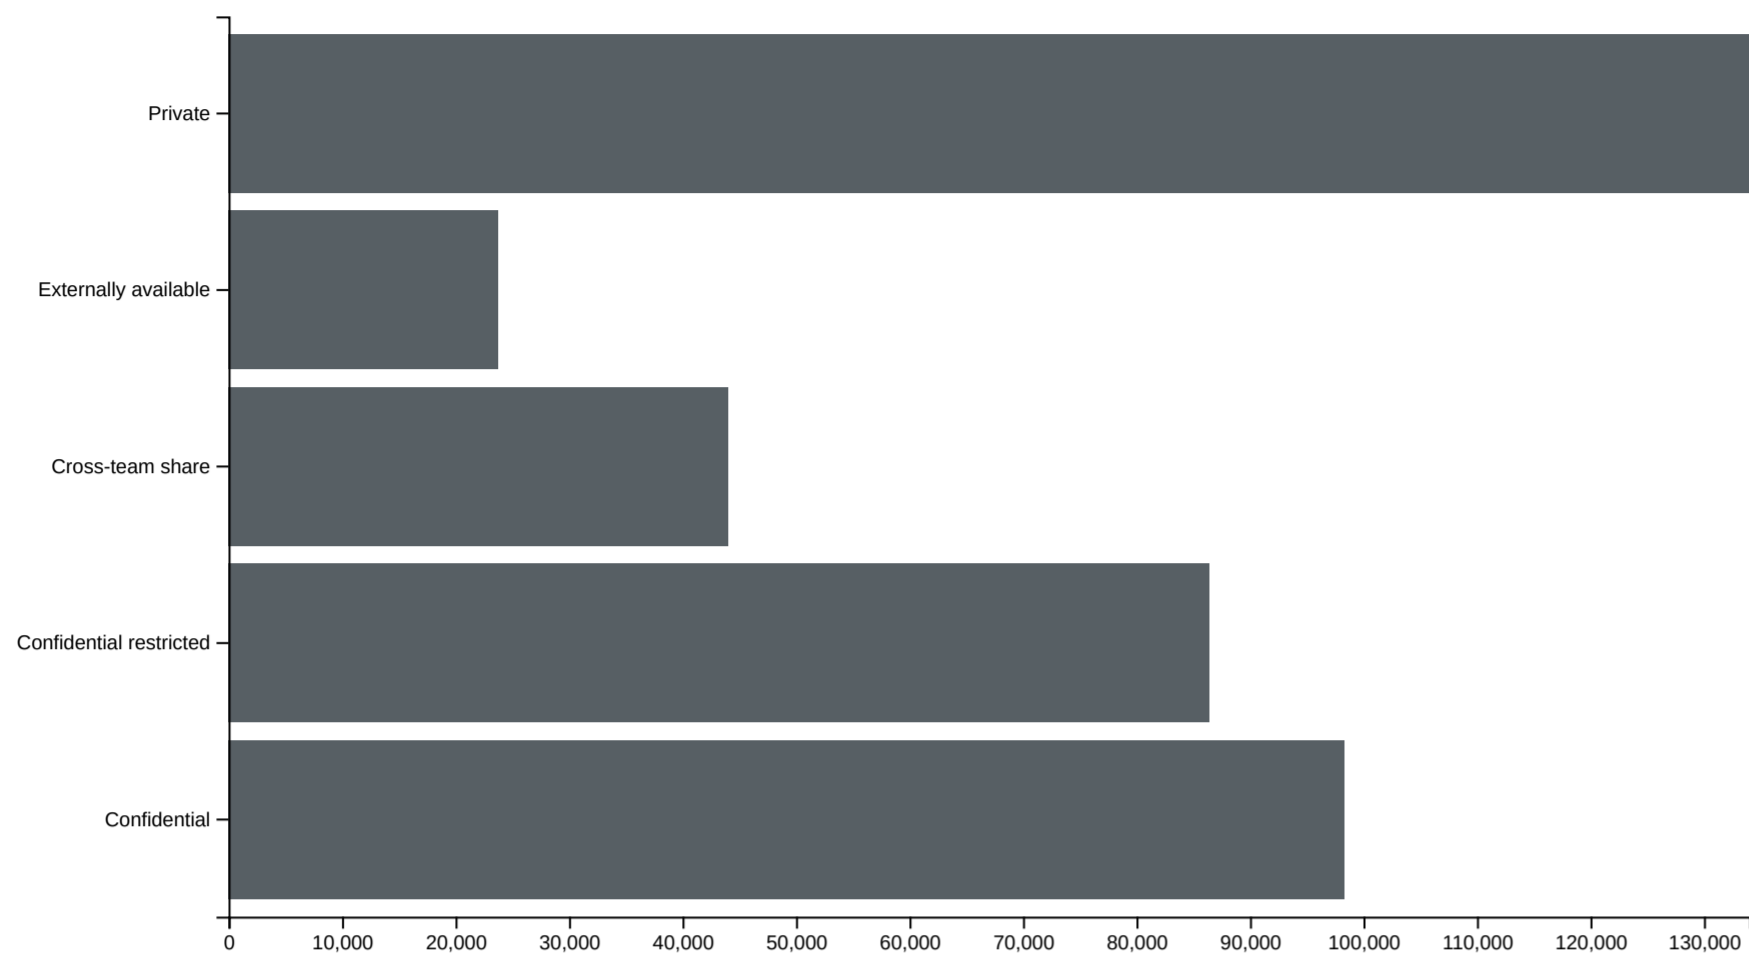

- Percentage trivial: 1.7%
- Change since last scan: 0%

Trivial files are defined in the Getvisibility platform as files that are zero length and files that have the extension LOG or TMP. This definition can be expanded or modified as needed.

Recommendations unavailable. No previous scan.

Mislocated File Categories

These bars represent the count of classified files as per the client classification levels at this point in the scan. A file qualifies to be counted if it is classified based on content, the patterns and keys; and then is checked against the folder it is in. If the folder is incorrect and does not contain the same classification keyword e.g. Confidential, then the file is considered mislocated and needs to be moved or deleted. Detailed listings of every file that make up the above totals is available from Getvisibility
